TRAINING UPDATES

In September 2017, the Collaborative Doctoral Program in Global Health (CDPGH) integrated the Masters Global Public Health Emphasis program to become the Collaborative Specialization in Global Health (CSGH). The new program offers all students, both Master's and Doctoral, a rich experiential environment and a vibrant global health learning community. This year there are **24 new CSGH students** (9 PhD and 15 Master's stream students)

Examples of recently defended dissertation of CSGH Students

Building Healthier Relationships Through Prevention: Views on Dating Violence from Guyanese Adolescents - Ruth Rodney, PhD in Lawrence S. Bloomberg Faculty of Nursing

A Systems Analysis and Operations Research Approach to Optimizing Health Technology Allocation for Low-income Countries: The case of medical oxygen for childhood pneumonia in The Gambia - Bev Bradley, PhD in Chemical Engineering & Applied Chemistry
