2018 PHESC Consultation: Results at a Glance

Reviewed 17 existing needs assessments

Developed and disseminated consultation paper to all PHUs

Top 3 Training Areas by Foundational Standard, According to Public Health Units

Health Equity

- Integrating health equity (including Indigenous health) into intervention design, implementation & evaluation
- 2. Cross-sector collaboration related to health equity
- 3. Cultural safety, cultural humility and anti-oppression training

Effective Public Health Practice

- 1. Design, implementation and evaluation of interventions
- 2. Effective community engagement; partnerships for planning, developing and implementing interventions
- 3. Inclusive and effective governance and leadership

Population Health Assessment

- 1. Epidemiological analysis (such as community mapping)
- 2. Developing and using health equity indicators
- 3. Introduction to population health assessment

We Also Heard That PHESC Should:

- Plan for the sustainability of training materials
- Build on PHUs' existing knowledge and training resources (e.g. Locally Driven Collaborative Projects (LDCPs), OnCore)
- Consider local PHU needs, for instance those serving the needs of rural communities

Preferred Delivery Methods
