

## Summer 2021 Course Delivery Details

<b>SOCIAL and BEHAVIOURAL HEALTH SCIENCES</b>	
<b>CHL5120H Y</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Students will participate using Zoom and this time will be used for lecture, discussion, and presentation of student assignments. Lectures and discussion will not be recorded.
<b>BIOSTATISTICS</b>	
<b>CHL5129H F</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Students will participate using Zoom and this time will be used for class lectures, discussion, student facilitations, and breakout activities. Supplemental material will also be provided online via Quercus to provide students with additional resources. Due to the interactive nature of the course, class sessions will generally not be recorded.
<b>CHL5212H F</b>	The course will be delivered online. Synchronous class time will be held weekly during the day and time indicated in the timetable. Lectures and full class discussions will not be recorded.
<b>CHL5213H F</b>	The course will be delivered online. Synchronous class time will be held weekly during the day and time indicated in the timetable. Lectures and full class discussions will not be recorded.
<b>CHL7001H Y1</b>	The course will be delivered online. Synchronous class time will be held weekly during the day and time indicated in the timetable. Additionally, there will be one-hour recorded lecture weekly, for asynchronous review.
<b>CHL7001H F1</b>	The course will be delivered online. Synchronous class time will be held weekly during the day and time indicated in the timetable. Lectures and full class discussions will not be recorded.
<b>EPIDEMIOLOGY</b>	
<b>CHL5429H S</b>	The course will be delivered online only with a combination of asynchronous and synchronous learning. Lectures will be pre-recorded and should be watched before class. Synchronous class time will be held weekly during the day and time indicated in the timetable. Class discussions will take place during the class time. Guest lectures will be delivered synchronously and will be recorded.

<b>Clinical Public Health</b>	
<b>CHL5610H F</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Students will participate using Zoom. Full class sessions will be recorded and made available to students for asynchronous review. Breakout group discussions will not be recorded.
<b>CHL5611H F</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Students will participate using Zoom. The sessions will be recorded and made available to students for asynchronous review. This modular five-day course is an intensively participatory course from 9am-4pm with multiple workshops. As such, participants are encouraged to be in class as those missing classes will not be able to have access to workshop material in small groups as they cannot be recorded.
<b>CHL5615H Y</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Class sessions will not be recorded.
<b>CHL5623H Y</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable.
<b>CHL5633H F</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable. Additionally, there will be online discussions in an asynchronous format.
<b>BIOETHICS</b>	
<b>CHL3020H F</b>	The course will be delivered online only. Synchronous class time will be held weekly during the day and time indicated in the timetable, however this class time will be reduced proportionately to the amount of time allocated, on a weekly basis, for the independent learning content indicated below. All class time will take place via videoconferencing using a tool indicated by the instructor. Synchronous time will maximize group discussion, but will also include shorter presentations delivered live by guest speakers with frequent opportunities for group discussion. Lectures and class discussion will not be recorded. Students will be expected to engage with multi-media content outside of synchronous class time.
