**JOB SUMMARY:**
We are looking for a full-time Qualitative Researcher to join our research team led by Dr. Reshma Amin, Division of Respiratory Medicine, SickKids and SickKids Research Institute, Toronto. The position is a one-year appointment with potential for renewal.

The successful candidate will work closely with Dr Amin’s research team at the Hospital for Sick Children. Some of her current projects include a multi-center RCT for a virtual care intervention for patients using long-term ventilation at home (LTV), a multi-center RCT for a virtual peer support intervention for family caregivers as well as a multi-center observational study to evaluate the Connected Care Program, the largest pediatric homecare implementation project to date for children with medical complexity. In addition, she is also evaluating a pediatric to adult transition program for individuals with Spinal Muscular Atrophy as well as the lived experience of patients and families with Spinal Muscular Atrophy. These projects aim to evaluate the impact of the disease on the patient and family as well as the healthcare system.

**PRIMARY RESPONSIBILITIES**
1. Qualitative interviews of patients, families, and healthcare providers for multiple projects.
2. Coding and analyzing qualitative data. Analyses will be framed by grant objectives.
3. Develop, analyze, write, and submit manuscripts for academic journals.
4. Assist in project related tasks, including preparing reports and presentations for various stakeholder groups, participation in meetings and team activities, contributions to data cleaning decisions, documentation and analysis, development of grant proposals for health research and evaluation funders.
5. Partner with Dr Amin in supporting/mentoring her current graduate students and their research.
6. Collaborate with team members to initiate new projects.

**QUALIFICATIONS**
- Masters or a Doctoral degree (preferred) in public health, health sciences, social sciences, interdisciplinary studies, epidemiology or equivalent.
- Strong background in qualitative research; including competency in using qualitative analysis software (such as NVivo or other similar programs) as well as qualitative analytical methods
- Strong written skills in English
- Ability to work independently, as well as part of a team
- Demonstrated publication record in peer-reviewed journals
- Creative and highly motivated
- Commitment to producing high quality work
- Collaborative, interdisciplinary researcher with an interest to foster a supportive research team

**WORKING CONDITIONS**
Due to the COVID-19 pandemic the successful candidate will work remotely, until on-site options are authorized by the hospital. The supervisor will ensure proper access the necessary computer infrastructure.
**TERM**
Funding is available for 1 year, with possibility of an extension.

**SALARY**
Commensurate with experience.

**START DATE**
As soon as a qualified applicant is selected

**HOW TO APPLY**
Please submit a cover letter that includes a description of previous and current research which highlights the skillset we are seeking for this position, as well as future plans for research and professional goals, a curriculum vitae, and 2-3 samples of scholarly writing.
